

Senator Hoagland. Senator Marsh, did you wish to speak on the... Senator Wesely. Senator Nelson, do you have anything more to add on this point? I will recognize you then.

SENATOR NELSON: Mr. President, also when I was figuring being conservative on the number ten, but I certainly agree with Senator Vickers. Twenty would be far more effective. So I would say at least 15 or better. The number is immaterial. I certainly agree with Senator Vickers.

PRESIDENT: Thank you, Senator Nelson. Is there anyone else that wishes to speak on the point number two? Speaker Nichol.

SPEAKER NICHOL: Mr. President, members of the Legislature, I don't have strong feelings, one way or the other, about 10 or 20, but I want to draw your attention to something that you may be thinking about between now and whenever this delegation goes, if they go, and that is that tentatively we've decided to go until approximately May 28 which is pretty close to the end of the spring time. But if we should take more time off then that, then you are probably into June. It doesn't matter to me. I'm going to be here as long as the Legislature is in session. But we are going to have a long time. Perhaps with ten we could stay in session and continue with the business and hearings and so forth. So it is just something for you to think about. Thank you.

PRESIDENT: Senator Haberman.

SENATOR HABERMAN: The problem is here. The problem has got to be solved back in Washington. If I have to stay an extra day, fine, or if we have to take a Friday that we were going to take off and work on that Friday, that is fine. I don't know whether everybody realizes, I'm sure some people don't, how bad it is. I had a farmer, last week, with 21 circles he's done in one county. I had another one with 40. It's a problem that, in my opinion, the solution is in Washington because we have to have a higher support price for our grain or you're going to lose another third of your farmers. Now unfortunately President Reagan's administration does not see fit to support this type of a program. So I am going to give the President the benefit of the doubt that he doesn't know or understand, that his advisors are split and that he doesn't realize. So the possibility of 20, or 25, or
